SUMMARY

Senior Product Manager with 14+ years of experience specializing in product strategy, program management and data-intensive platforms. Expert in leading multi-year roadmaps and shipping production-scale features. Proven track record of bridging business strategy with engineering execution by authoring detailed technical specifications and managing complex trade-offs for cross-functional teams and executive leadership.

EXPERIENCE

Senior Product Manager

Albertsons Inc

October 2018 - Present, Pleasanton, California

- Built a cross-platform Unified dietary preference engine allowing customers to set preferences once and utilize across grocery, meals, and health experiences, eliminating repetitive data entry, increased product recommendation clicks, recipe engagement, removed data aggregation tasks, cost savings of 8%.
- Led the development of a Self-serve house holding holding feature for mobile apps, enabling customers to self-household, house holding, reduced customer support call volume by 6% via a seamless in-app experience.
- Delivered a Self-serve account merge feature across mobile and web, enabling customers to consolidate duplicate accounts, Improved loyalty redemptions, better subscription utilization, reduced 132K duplicate accounts.
- Oversaw the technical roadmap for retail initiatives & omni-channel features, coordinating the integration of store receipts, Kiosk ordering, and gift orders into the e-commerce pipeline, resulting in a 22% increase in cross-channel transactions.
- Managed cross-functional engineering streams to synchronize mobile, web, and in-store experiences through advanced data integration techniques, ensuring a cohesive and scalable customer journey architecture..
- Collaborated across store operations, engineering, marketing, and customer support teams to analyze user incidents using root cause analysis, driving an improvement in KPI, success metrics, customer satisfaction, feature adoption through product enhancements.
- Led the implementation of personalized AI gift messaging using VertexAI, Portkey, translate technical concepts, creating process flows, while ensuring compliance with ethical AI, data privacy, and enterprise governance standards improving gift order volume by 13%.

Technical Program Manager

Gap Inc

May 2008 - September 2018, San Francisco, California

- Directed a cross-functional team of 15 engineers and product specialists to deliver Order Management System (OMS) and Next Day Delivery, driving an 18% reduction in fulfillment time and establishing scalable solutions.
- Spearheaded the Inventory and Capacity Management System (ICM) revamp, achieving a 35% improvement in inventory accuracy and enabling order fulfillment with a multi-DC model.
- Managed the MiniQ project by developing comprehensive project plans, including scope, objectives, and milestones, while optimizing resource allocation to resolve critical defects on schedule.
- Managed the technical delivery of Japan E-commerce websites and Outlet Stores websites, enabling global market expansion and a 15% increase in digital revenue through innovation frameworks.

Sr Software Engineer

OSI Technologies Inc

January 2003 - May 2008, Hyderabad, Telangana

- Developed and executed test plans for Artemis portfolio and project management systems, reducing post-release defects by 25% and ensuring 100% compliance with client specifications.
- Automated functional testing for new builds using Selenium, increasing testing coverage by 40% and reducing manual testing effort by 50 hours per month.
- Integrated robust CI/CD pipelines leveraging Jenkins and Git, accelerating deployment frequency by 20% while maintaining consistent build quality.

EDUCATION

Master's in Computer Applications

Birla Institute of Technology

CERTIFICATIONS

PMI Agile Certified Practitioner (PMI-ACP)

Project Management Institute

AI For Everyone

DeepLearning.AI

SKILLS

Product & Leadership: Discovery, Roadmaps, Delivery, Risk & Mitigation, Capacity Planning, Change Management, Stakeholder Alignment, Problem Solving, Decision-Making, Team Collaboration, Root Cause Analysis (RCA), Experimentation

Data Analysis: Google Analytics, Adobe Analytics, MixPanel, Tableau, BigQuery, Snowflake, Power BI

Tools & Technologies: Java, SpringBoot, Python, JavaScript, ReactJS, AEM, MongoDB, ElasticDB, MySQL, Azure Cloud, Azure Databricks, HDInsight, Jira, Confluence, Figma, Kubernetes, PCF, Kafka, EventHubs, GitHub Actions, Jenkins, Grafana, Maven & Gradle, Okta, Order Management (OMS), Warehouse Management (WMS)

AI & Generative Platforms: AI Strategy & Delivery, Claude Code, RAG, MCP, Evals, AI Observability, N8N Work Flows, Vertex AI, Portkey, LangGraph, LangSmith, LangChain, Vector Databases
